South Texas Project Electric Generating Station
Unit 1
Docket No. STN 50-498
Proposed Technical Specification Revision to Offsite
and Onsite Organization Figures

Pursuant to 10CFR50.90, Houston Lighting & Power (HL&P) hereby proposes to amend its Operating License NPF-71, by incorporating the attached proposed change into the Technical Specifications, Nureg-1255, for South Texas Unit 1. We would appreciate your expeditious review of this matter.

Specifically, the proposed change to Technical Specification Figures 6.2-1 and 6.2-2 identify proposed organizational changes within HL&P.

Significant Hazards Analysis

The Commission has provided standards in 10CFR50.92(c) for determining whether a significant hazards consideration exists. A proposed amendment to an Operating License for a facility does not involve significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in the margin of safety. HL&P has reviewed the proposed change and determined that:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated because the organizational changes are consistent with the future operation of both Units 1 & 2.
2. The proposed amendment does not create the possibility of a new or different kind of accident than previously evaluated because the proposed change is administrative in nature, and no physical alterations of plant configuration or changes to setpoints or operating parameters are proposed.

3. The proposed amendment does not involve a significant reduction in the margin of safety in as much as the change is administrative in nature and the changes will facilitate continued operation of Unit 1 while Unit 2 completes preoperational testing and enters operation.

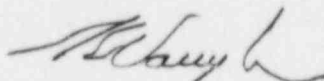

Based on the above reasoning, HL&P has determined that the proposed amendment does not involve a significant hazards consideration. Additionally, based upon the information contained in this submittal and the NRC Final Environmental Assessment for South Texas Units 1 & 2, HL&P has concluded that pursuant to 10CFR51, there are no significant radiological or non-radiological impacts associated with the proposed action and that the proposed license amendment will not have a significant effect on the quality of the human environment.

The South Texas Unit 1 Nuclear Safety Review Board has reviewed and approved the attached proposed revision and has approved the proposed change.

In accordance with 10CFR50.91(b), HL&P is providing the State of Texas with a copy of this proposed amendment.

Pursuant to the requirements of 10CFR170.12(c), enclosed with this amendment is the application fee of \$150.00.

If you should have any questions on this matter, please contact Ms. F. A. White at (512) 972-7985.
