Re: George S. White, et. ux., et. al. -v- Capco
and/or Duquesne Light Company/Beaver Valley
Reactor No. 2, Shippingport, PA

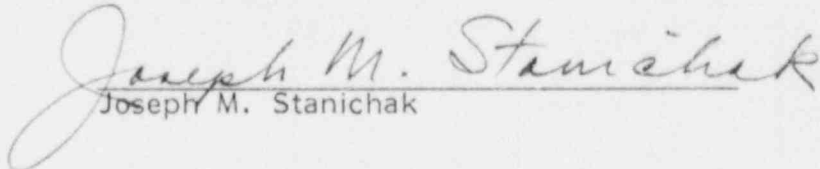

Dear Mr. Murley:

I have been informed that on Thursday, January 28, 1988, there was a secondary stage alert at the Beaver Valley Power Station. I have information that twenty-seven municipalities were notified upon this happening.

This complaint is that Mr. and Mrs. George White, who live within a stone's throw away from the epicenter of this reactor, were not notified of the happening at anytime. It is my further information that there is either an inadequate procedure or there is no procedure to report such happenings to persons living within a stone's throw of the epicenter.

I view this as a totally inadequate disaster plan and request that you launch an immediate investigation into this area. Please advise.

Yours truly,

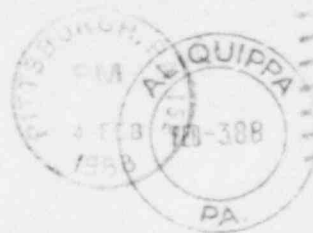

Joseph M. Stanichak
