Docket No. 50-483

Union Electric Company  
ATTN: Mr. Donald F. Schnell  
Senior Vice President  
Post Office Box 149 - Mail Code 400  
St. Louis, MO 63166

Dear Mr. Schnell:

SUBJECT: PHYSICAL SECURITY INSPECTION AT THE CALLAWAY NUCLEAR PLANT

This refers to the inspection conducted by Mr. G. Pirtle of this office between August 16 and 24, 1993. The inspection included a review of authorized activities for your Callaway Nuclear Power Station facility. At the conclusion of the onsite inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations of activities in progress.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed notice. The violation is of concern because it showed inadequate attention to detail of personnel who had manned the security post and inadequate checks of the post by supervisors. The inspection showed that actions had been taken to correct the identified violation and to prevent recurrence. Our understanding of your corrective actions is described in Paragraph 4.a of the enclosed inspection report. Consequently, no reply to the violation is required and we have no further questions regarding this matter at this time.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
