SUBJECT: NRC INSPECTION REPORT 50-382/94-17

This refers to the inspection conducted by Mr. A. D. Gaines of this office on July 18-22, 1994. The inspection included a review of activities authorized for your Waterford Steam Electric Station, Unit 3 facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented in the enclosed report.

It is our understanding that, at the exit meeting John Houghtaling, Technical Services Manager, committed to revise Training Procedure NTC-238, "Radwaste Services Continuing Training," to include the radwaste personnel required to attend periodic training as addressed in your June 16, 1983 response to NRC Bulletin 79-19. If your understanding of this commitment differs from ours, please contact me immediately.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Samuel J. Collins, Director
Division of Radiation Safety
and Safeguards
