Mr. M. L. Young
10 Central Road
Rye, New Hampshire 03870

Dear Mr. Young:

The New Hampshire Civil Defense Agency is currently responding to comments of the Regional Assistance Committee (RAC) of the Federal Emergency Management Agency pertaining to New Hampshire state and local Radiological Emergency Response Plans (NHRERP) for Seabrook Station. This is an additional opportunity to incorporate changes as suggested by local officials into the planning documents.

A work program has been established to ensure timely incorporation of the proposed changes into the plans and procedures. When the work program is complete, changes will be distributed in the form of a revision to all holders of controlled copies of the plans and procedures.

Your Technological Hazards Division representative will be contacting you to review with you the comments of the RAC and suggested modifications to plans and procedures which you might present. We would appreciate your helping us meet an August 1st deadline for compiling comments and suggestions.

As holder of control copy # 3 of the Rye RERP Plan, your cooperation and assistance with this latest effort to improve and refine the New Hampshire Radiological Emergency Response Plans will be greatly appreciated. If you require further information, please do not hesitate to contact this office.

Sincerely,

8802120048 871021
