Mr. Henry G. Vickers, Regional Director
Federal Emergency Management Agency
Region 1
J.W. McCormack Post Office and Court House
Boston, Massachusetts 02109

Dear Mr. Vickers:

I respectfully request that you formally accept for review in accordance with 44 CFR 350 the enclosed Summary of Personnel Resource Assessment dated August, 1987. For your information, this will be formally served to parties to the New Hampshire Offsite Emergency Planning hearings and to FEMA.

Although this document is not a part of the New Hampshire Radiological Emergency Response Plan (NHREERP) per se, it does address the adequacy of personnel resources for the State of New Hampshire and the New Hampshire EPZ communities.

Also, it addresses several technical review comments of the RAC on the New Hampshire state and local plans. The comments generally concerned the capability to meet NUREG-0654, Criterion A.4.

The Summary deals with all 17 communities within the New Hampshire portion of the Seabrook Station EPZ. The State of New Hampshire agencies considered in the summary include those that have been assigned responsibilities in the NHREERP for assisting local communities with implementing emergency response operations.

The Summary is based upon the dynamic process to systematically assess the resources required and available to implement the plans. It is the result, wherever possible, of an active dialogue with the town officials so that the State, the Utility, and the local communities may assist each other in achieving the most efficient utilization of personnel resources needed to implement the RERP.

In addition, the Summary is responsive to the ASLB's inquiry of July 6, 1987, regarding your position on the several contentions related to the personnel resource issues.

Sincerely
