Docket Nos. 50-277
50-278

License Nos. DPR-44
DPR-56

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Subject: Peach Bottom Atomic Power Station, Units 2 and 3
Response to Request for Additional Information
Regarding Power Rerate Program (RAI-8)

Dear Sir:

Per the telephone conversation between PECO Energy Company and the U. S. Nuclear Regulatory Commission staff on September 8, 1994, attached is the "Fatigue Evaluation of the Peach Bottom II and III Reactor Vessels," GE-NE-523-61-0493, dated May 1993, for your review. This document was requested as part of the review of the planned implementation of the Power Rerate Program at Peach Bottom Atomic Power Station (PBAPS), Units 2 and 3. The Power Rerate Program was the subject of Technical Specifications Change Request (TSCR) No. 93-12 which was forwarded to you by letter dated June 23, 1993.

Please note that this fatigue reevaluation program was performed as an interim measure to redistribute calculated thermal fatigue more realistically during plant lifetime and is conservative. Future reevaluation, which will utilize actual plant experience and more refined calculational methods, will be performed as necessary.

If you have any questions, please contact us.

Very truly yours,

G. A. Hunger, Jr.
Director - Licensing
