Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-302/88-03

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by F. N. Wright on January 5-7, 1988. The inspection included a review of activities authorized for your Crystal River facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

The inspection was conducted to investigate the circumstances surrounding a radiation worker's entry into a high radiation area without a radiation dose rate monitoring device as required by Technical Specifications. The inspection consisted of selected examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The violations described in the enclosed Inspection Report are under consideration for escalated enforcement action. Accordingly, no Notice of Violation is being issued at this time, and no response to this letter is required. However, please be advised that the number and characterization of violations described in the enclosed Inspection Report may change as a result of further NRC review. You will be advised by separate correspondence of the results of our deliberations on this matter.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,
