

October 28, 1994

MEMORANDUM TO: Distribution

FROM: Ralph O. Meyer
Division of Systems Research
Office of Nuclear Regulatory Research

SUBJECT: PAPERS FOR HIGH-BURNUP SESSION OF 22nd WRSM

Attached are advanced copies of all five papers plus the introduction for Session 11 -- High-Burnup Fuel Behavior -- of the NRC's 22nd Water Reactor Safety Information Meeting. With one exception, we believe that this is the same material that will be published in the WRSM Proceedings that will be issued as a NUREG/CP around April 1995. That exception is the last paper by R. McCardell of INEL, for which written text will be prepared.

Attachments: As stated
