NOTE TO: Harold Denton, NRR
Jim Taylor, IE
FROM: Jim Lieberman, OELD
SUBJECT: OI REVIEW OF FERMI SAFETEAM PROGRAM

I have just realized that ELD has the only copy of OI's review of the Fermi Safeteam Program. I have made copies of the first volume of the report for NRR and IE. The second volume containing the exhibits is four inches thick. I am forwarding that volume to Jim Taylor.

October 29, 1985

MEMORANDUM FOR: Charles E. Norelius, Director, Division of Reactor Projects
FROM: Charles H. Weil, Investigation and Compliance Specialist
SUBJECT: OFFICE OF INVESTIGATIONS' REVIEW OF THE FERMI SAFETEAM
(50-341) (AMS NO. RIII-85-A-0176)

Region III has received the Office of Investigations report of their review of the Detroit Edison Company's SAFETEAM at the Fermi 2 plant. The SAFETEAM is Detroit Edison's program for the processing of allegations brought directly to their attention.

The Division of Reactor Projects Review of the report should include as a minimum:

- . Does the OI report invalidate the findings of any of the Region III inspections done in the weeks immediately preceding the licensing of the Fermi plant?
- . Determine if Detroit Edison has implemented their proposed improvements to the SAFETEAM process, those proposals having come as a result of the NRC review of the SAFETEAM.

The OI report is available for review from the Region III Enforcement and Investigation Coordination Staff.

The Office of Investigations has directed that no part of the report may be reproduced nor can it be made public.

Charles H. Weil
Investigation and
Compliance Specialist

DEC 5 1985

MEMORANDUM FOR: Charles H. Weil, Investigation and Compliance Specialist
FROM: Charles E. Norelius, Director, Division of Reactor Projects
SUBJECT: OFFICE OF INVESTIGATIONS REVIEW OF THE FERMI SAFETEAM
(AMS NO. RIII-85-A-0176)

The review has been completed and there have been no findings that invalidate any of the Region III inspections. As you are aware, prior to licensing, both the licensee and Region III conducted thorough evaluations of the Safeteam to ensure that there were no major safety problems associated with the existing concerns. Additionally, our review indicates that enforcement action is not necessary.

The implementation and effectiveness of the licensee's proposed improvements to the safeteam have not been fully evaluated. The resident inspectors are monitoring the licensee actions and will document these findings in routine inspection reports. However, based on the resolution of a recent environmental/seismic qualification concern, we will also evaluate the need for a quarterly update. If you have any further questions contact N. J. Chrissotimos (Ext. 716) of my staff.
