

December 16, 1994

Mr. Robert E. Denton  
Vice President - Nuclear Energy  
Baltimore Gas and Electric Company  
Calvert Cliffs Nuclear Power Plant  
1650 Calvert Cliffs Parkway  
Lusby, MD 20657 - 4702

SUBJECT: COMBINED INSPECTION REPORT NOS. 50-317/94-33 AND 50-318/94-32

Dear Mr. Denton:

This letter transmits the findings of an inspection of licensed operator requalification training conducted by J. Prell and N. Maquire-Moffitt from November 14-18, 1994, at Calvert Cliffs Nuclear Power Plant, Units 1 and 2. The inspection was conducted to verify that the Calvert Cliffs' requalification program for licensed operators ensured safe power operation by effectively evaluating how well individual operators and crews have mastered training and performance objectives. The inspection findings were discussed with Mr. K. Nietmann and other members of your staff at the conclusion of the inspection.

Overall, the requalification training and evaluation program was determined to be excellent. The training department did a very good job of identifying operator weaknesses and recommending appropriate remediation. Operations department involvement with the requalification training program was found to be a major strength. The inspectors concluded that Calvert Cliffs' response to past events involving operator errors was prompt and effective. The training feedback system was also determined to be effective.

In accordance with 10 CFR 2.790 of NRC's "Rules of Practice," a copy of this letter and the enclosure will be placed in the NRC Public Document Room. If you have any questions, please call me at (610) 337-5211.

Sincerely,

Glenn W. Meyer, Chief  
BWR and PWR Sections  
Division of Reactor Safety

Enclosure: Combined Inspection Report Nos.  
50-317/94-33 and 50-318/94-32 w/Attachment 1
