Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP) Report No.
50-219/86-99

The NRC Region I SALP Board conducted a review on November 17, 1987, and evaluated the performance of activities associated with the Oyster Creek Nuclear Generating Station. The results of this assessment are documented in the enclosed SALP report, which covers the period October 16, 1986 to September 30, 1987. We will contact you shortly to schedule a meeting to discuss the report.

At the meeting, you should be prepared to discuss our assessment and any plans you may have to improve performance. In particular, you should be prepared to discuss the plans you have to upgrade performance in Plant Operations and Technical Support in light of the reduction in performance in these areas.

Following our meeting and receipt of your response, the enclosed report, your response, and summary of our findings and planned actions will be placed in the NRC Public Document Room.

Your cooperation is appreciated.

Sincerely,
