

FEB 18 1988

Docket No. 50-395

Mr. D. A. Nauman  
Vice President, Nuclear Operations  
South Carolina Electric & Gas Company  
P. O. Box 88 (Mail Code 601)  
Jenkinsville, SC 29065

Dear Mr. Nauman:

SUBJECT: V. C. SUMMER NUCLEAR STATION - IMPLEMENTATION OF  
ATWS RULE (10 CFR 50.62)

In a review of our records, we have determined that you have not submitted your anticipated transient without scram (ATWS) design review package pursuant to 10 CFR 50.62(c)(6).

It is the intent of the NRC to complete all ATWS reviews by the end of Fiscal Year 1988. In order for this schedule to be met, it is necessary that you transmit your ATWS design review package for your facility which details the manner in which you wish to demonstrate compliance with the ATWS requirements. We intend to group, where possible, the Westinghouse ATWS design review packages into specific review categories based upon the selection by the licensee of one of the three approved generic logic designs. It is anticipated that such a grouping would reduce the number of plant specific safety evaluations and, therefore, expedite the process.

Please provide your ATWS design review package within 30 days of the receipt of this letter.

Sincerely,

JS

John J. Hayes, Jr., Project Manager  
Project Directorate II-1  
Division of Reactor Projects - I/II  
Office of Nuclear Reactor Regulation
