Kerr-McGee Oil Industries, Inc.
Navajo Uranium Division
P. O. Box 608
Shiprock, New Mexico

ATTENTION: Mr. M. F. Bolton

Gentlemen:

Records of the Atomic Energy Commission indicate that, under a license which has expired, you were authorized to receive and transfer uranium and/or thorium source material. Under former regulations, a license to possess source material was not required.

Under revised regulation 10 CFR 40, "Licensing of Source Material," effective February 13, 1961, a copy of which is attached, any person who possesses source material must now be specifically licensed unless the material is possessed pursuant to a general license or an exemption established in the regulations.

Accordingly, if you possess uranium or thorium source material that is not exempted from the licensing requirement (see Section 40.13 of the regulation for details) or if you possess such material and you are not generally licensed (see Section 40.22), you are required to obtain a license pursuant to Section 40.47 of the regulations in order to retain possession of the material.

In the event a specific license is required, your application should be submitted on Form AEC-2 in quadruplicate, which is enclosed for your convenience.

If you do not wish to renew your license or a specific license is not
