U. S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, D. C. 20555

Subject: Catawba Nuclear Station, Units 1 and 2  
Docket Nos. 50-413 and 50-414  
Technical Specification Amendment  
Auxiliary Feedwater (CA) Discharge Flow Path  
Surveillance Requirement 4.7.1.2.1a.4)

Dear Sir:

This letter contains a proposed amendment to the Technical Specifications for Facility Operating License Nos. NPF-35 and NPF-52 for Catawba Units 1 and 2. The request involves specifying that Surveillance Requirement 4.7.1.2.1a.4) is intended to apply to the CA discharge flow path. This request would also substitute Catawba specific wording in place of Standard Technical Specification wording as to the time when the surveillance is required.

The attachment contains the proposed change and a discussion of the justification and safety analysis. The analysis is included pursuant to 10 CFR 50.91 and it has been concluded that the proposed amendment does not involve significant hazards considerations.

This proposal involves one amendment request to Catawba's Technical Specifications. Accordingly, pursuant to 10 CFR 170.21 a check for \$150.00 is enclosed.

Pursuant to 10 CFR 50.91 (b) (1) the appropriate South Carolina State Official is being provided a copy of this amendment request.

Very truly yours

Hal B. Tucker
