ATTENTION: T. R. QUAY

SUBJECT: REVISION 2 OF THE AP600 CERTIFIED DESIGN MATERIAL

Dear Mr. Quay:

Enclosed is Revision 2 of the AP600 Certified Design Material (CDM), including the Inspections, Tests, Analyses and Acceptance Criteria (ITAAC). This revision supersedes Revision 1 which was submitted in December 1992. The Revision is in the form of a complete replacement. Thirty-six copies of this update are being sent to Mrs. Diane Jackson for distribution to the NRC staff.

Per our discussions with Mr. Sebrosky of your staff, this letter also confirms our meeting on Wednesday, November 13, 1996 from 9:00AM to 12:00N in the Westinghouse Rockville Nuclear Licensing Center. The purpose of the meeting is to describe the process we used to select tier 1 material, and to compare our submittal with the draft Standard Review Plan Section 14.3 which was issued in April 1996.

This information includes no information classified as proprietary.

Please contact Brian A. McIntyre on (412) 374-4334 if you have any questions concerning this transmittal.

Brian A. McIntyre, Manager
Advanced Plant Safety and Licensing
