Project No. 669

MEMORANDUM TO: John E. Zerbe, Assistant for CRGR Issues
Office of Analysis and Evaluation of
Operational Data

FROM: Lester S. Rubenstein, Director
Standardization and Non-Power
Reactor Project Directorate
Division of Reactor Projects III, IV,
V and Special Projects
Office of Nuclear Reactor Regulation

SUBJECT: EPRI'S ADVANCED LWR PROGRAM

Enclosed are 15 copies of my letter to Mr. Edwin E. Kintner, Chairman of the ALWR Utility Steering Committee, dated February 18, 1988, forwarding the staff's Draft SER (DSER) on Chapter 2 of EPRI's ALWR Utility Requirements Document. Also enclosed are one copy of Chapter 2 and revised copies of the DSER for Chapter 1. These documents are being provided to inform the CRGR members and staff of our progress in reviewing the Requirements Document.

Chapters 3, 4 and 5 of the Requirements Document are presently under review and we expect Chapters 6 through 13 to be submitted for review throughout the remainder of 1988. As indicated in my memorandum to you dated September 30, 1987, we plan to issue DSERs on these chapters at various times through September 1989. Then, EPRI intends to submit its "Rollup Document", with changes throughout the 13 chapters, about mid-1990. We are presently scheduled to review those changes and issue the final SER on the entire Requirements Document by January 1991.

Should CRGR desire further information about our review, we will be pleased to discuss it with them.
