

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

NOTE TO: Gary Holahan

THRU: Ken Perkins *File for*

FROM: Tom Alexion

DATE: February 9, 1988

SUBJECT: VISIT BY UNION ELECTRIC COMPANY ON FEBRUARY 11, 1988

Al Passwater, Manager of Licensing and Fuels at Callaway, has expressed an interest in meeting with you on the afternoon (around 3:30 PM) of February 11, 1988 for a short chat. Al did not mention any topic of discussion, however, I suspect he may want to discuss the status of the uprating review.

Regarding the uprating review, SPLB has recently taken the position that they cannot complete their uprating review until the main-steam-line-break-outside-containment-with-superheated-steam review is completed. The superheat review has one open item, regarding questionable qualification of the MSIV/MFIV control cable, wiring and lugs. However, if this open item is resolved quickly ( a conference call is planned for today), the superheat review should not impact the issuance of the uprating amendment.

*Gary  
What's the status  
of this review. It's  
been around for  
a long time.
