Subject: Response to NRC Generic Letter 88-02

In response to the NRC Generic Letter 88-02 (Reference 2) Detroit Edison Company hereby provides the information requested regarding our interest in participating in the Integrated Safety Assessment Program II (ISAP II). As explained in the enclosure, Fermi 2 will not be able to participate in ISAP II until about five years from now.

If you have any questions, please contact me at (313) 586-1842.

Sincerely,

S. G. Catola, Chairman  
Nuclear Safety Review Group

Integrated Safety Assessment Program (ISAP) II

Response Format to Generic Letter 88-02

Facility Name: Fermi 2

Utility: Detroit Edison

Individual Contact Name: S. G. Catola Phone Number: 313-586-1842

An expression of interest will not be considered a commitment to participate on the part of the utility.

1. Would you be interested in participating in ISAP II? If so, in what time frame?  
Fermi 2 is 6 months from completing a level 1 PRA. We have no procedures in place for either maintaining the currency of the model or for incorporating plant-specific failure rates. (We plan to eventually have these, of course.) It is our conclusion that Fermi 2 will not be able to participate in ISAP II until about five years from now.
2. Do you believe that an industry/NRC seminar consisting of a brief discussion by NRC followed by a question and answer period would be beneficial prior to making a decision?  
No
3. Would you be interested in a one-on-one meeting with the NRC to discuss your particular facility or facilities?  
No
4. If you remain undecided regarding participation, what additional information do you need in order to make a decision?  
No
5. Do you have any potential concerns about participating in ISAP II?  
No
6. Do you have any suggestions for program improvements or changes?  
No
