Docket No. 50-322

Long Island Lighting Company
ATTN: Mr. John D. Leonard, Jr.
Vice President - Nuclear
P. O. Box 618
Shoreham Nuclear Power Station
Wading River, New York 11792

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP) Report
Number 50-322/86-99

This refers to the SALP for the Shoreham Nuclear Power Station, conducted by this office on September 18, 1987, and discussed with your staff at a meeting on January 5, 1988, in Hauppauge, New York. The list of meeting participants is attached as Enclosure 1. The NRC Region I SALP Report, covering the period March 1, 1986 through July 31, 1987, is provided as Enclosure 2. The final report contains revised pages 38 and Table 5 to correct typographical errors from the original report, which was transmitted for your review with our letter of December 1, 1987 (Enclosure 3). Your response, dated January 29, 1988, is provided as Enclosure 4. Based on our review of your written response and of the discussions at the January 5, 1988 meeting, no substantive amendments to the December 1, 1987 SALP report have been deemed necessary.

Our overall assessment of activities at Shoreham during the assessment period is that your performance reflected noteworthy improvement in several functional areas, such that a generally high level of safety performance was achieved. Periods of reactor operation were especially well-controlled and well-executed. While strong management involvement in the evaluated areas was noted, challenges of a more significant nature in several of these functional areas will await Shoreham Nuclear Power Station and its personnel if higher power operations are subsequently authorized. Your response to the enclosed SALP report appears to recognize this fact and reflects a positive attitude toward implementing new programmatic initiatives where necessary.

No reply to this letter is required. We believe that our meeting with you and the resulting interchange of information were beneficial and improved the mutual understanding of your activities and our regulatory program. Your actions in response to this SALP will be reviewed during future NRC inspections of your facility.
