

FEB 19 1988

Official

Westinghouse Electric Corporation
ATTN: Mr. E. P. Loch, Manager
Columbia Plant
Commercial Nuclear Fuel Division
Drawer R
Columbia, SC 29250

Gentlemen:

SUBJECT: SUBMITTAL OF OBJECTIVES AND DETAILED SCENARIOS FOR
ANNUAL EMERGENCY DRILL

As part of our routine inspection program for your facility, we may elect to observe the required annual radiological emergency response drill at your facility. To facilitate scheduling of and preparation for such an inspection, we are requesting that you provide the following information in accordance with the schedule listed below:

Period in Advance of Drill

Information to be Submitted

45 days

Date and time of drill; description of scope of drill and objectives to be fulfilled.

20 days

Complete drill scenario, including any controller information and simulation data to be used

The information requested above is exempt from internal and public disclosure under 10 CFR 2.790(a)(4) until after the drill. In order to preclude such disclosure, the requested information should be sent to the Chief, Emergency Preparedness Section, U. S. Nuclear Regulatory Commission, Region II, at the letterhead address, marked "to be opened by addressee only." Directing your submittals in this manner will shield them from routine distribution within the NRC and transmittance to the Public Document Room prior to the drill.

We appreciate your cooperation in this matter. Should you have any questions, please call Mr. Thomas R. Decker on (404) 331-2559.

Sincerely,

8803160056 880219
