

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION I  
631 PARK AVENUE  
KING OF PRUSSIA, PENNSYLVANIA 19406

Docket No. 030-09121

NOV 01 1978

PPG Industries, Inc.  
Chemical Division  
ATTN: Mr. J. Cheriton  
Room GO 20 East  
1 Gateway Center  
Pittsburgh, Pennsylvania 15222

Gentlemen:

SUBJECT: NOTICE OF EXPIRED LICENSE

This refers to the telephone discussion between Mr. B. O'Neill of this office and Mr. J. Cheriton of your organization on October 17, 1978.

NRC records show that the Byproduct Material License identified above has expired and no renewal application has been filed in accordance with Section 30.37 of Title 10, Code of Federal Regulations, Part 30.

From our discussion with your representative we learned that you still possess material which requires a specific NRC license. Your possession of that material without a valid, specific license is a violation of Section 30.3, 10 CFR Part 30.

If you want to continue your program, you must immediately submit the enclosed NRC Form 313, "Application for Byproduct Materials License" to the Radioisotopes Licensing Branch, Office of Nuclear Materials Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555. A copy of the letter forwarding the application to the licensing branch (but not the application) should be sent to Region I, U.S. Nuclear Regulatory Commission, 631 Park Avenue, King of Prussia, Pennsylvania, 19406, ATTN: Mr. R. O. McClintock, Chief, Materials Radiological Protection Section, Fuel Facility and Materials Safety Branch.

Also, you must place the radioactive material on hand in secure storage until such time as you acquire a valid license; no other use of the material on hand or purchase of additional byproduct material is authorized.

7812200069

NOV 01 1978

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee as required by Section 170.31, 10 CFR Part 170 and, if one is required, submit the appropriate fee along with the application.

A copy of the statement shall be sent, within fifteen (15) days of the receipt of this letter, to Region I, U.S. Nuclear Regulatory Commission, 631 Park Avenue, King of Prussia, Pennsylvania, 19406, ATTN: Mr. R. O. McClintock, Chief, Materials Radiological Protection Section, Fuel Facility and Materials Safety Branch.

Also, if the activities conducted under the expired license were subject to the reporting requirements of 10 CFR 20.407, you must submit the annual report required by 20.408 for individuals engaged in activities under the expired license. Those reports must be submitted to the Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, ATTN: Mr. J. B. Winningham.

If you want to reactivate your program, you must submit the enclosed NRC Form 313, "Application for Byproduct Materials License", to the Radioisotopes Licensing Branch, Office of Nuclear Materials Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555. A copy of the letter forwarding the application to the licensing branch (but not the application) should be sent to Region I, U.S. Nuclear Regulatory Commission, 631 Park Avenue, King of Prussia, Pennsylvania, 19406, ATTN: Mr. R. O. McClintock, Chief, Materials Radiological Protection Section, Fuel Facility and Materials Safety Branch.

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee under Section 170.31 of 10 CFR Part 170 and, if one is required, you must submit the appropriate fee along with the application.

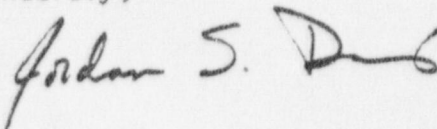

PPG Industries, Inc.
