RE: Radioactive Materials License
39-19727-01, Renewal

Dear Mr. Potter:

The enclosed license renewal application, in its entirety, replaces all previous submittals. In addition to updating the previous license, this application includes the substantive provisions of past correspondence. The format, which is standardized with our other licenses, allows quick reference to specific items. You will also note that all pages are dated with revision and page numbers. This is to permit future modifications to be page changes rather than letter references, thus assuring a single, organized document to verify compliance.

Since the above-referenced license expires on May 31, 1986, we would appreciate a letter of timely renewal as quickly as possible.

Enclosed is a check covering the renewal fee as specified in 10CFR170.31 under the fee category of nuclear laundries. Should you have any questions regarding the license application, do not hesitate to contact me at (413) 543-6911 or Mr. William Moser, our Southern Operations Manager, at (803) 771-4600.

Sincerely,
INS Corp

Gregg A. Johnstone
