DOCKET NUMBER
PROPOSED RULE PR 50

to the N.R.C. (Nuclear Regulatory Commission) (53FR16435)

'88 JUL 11 P2:49

The safety of millions of people is at stake in Seabrook. ^{DOCKET BRANCH} ~~DOCKET BRANCH~~ action on the part of the Nuclear Regulatory Commission will insure that safety. But any relaxing of regulations or proposed rule changes to aid low power testing at the Seabrook Nuclear Power Plant at the expense of the people of New Hampshire and Massachusetts is very irresponsible and borders on criminal. Please reconsider.
