MEMORANDUM FOR: Diablo Canyon Board Members

FROM: Steven A. Varga, Acting Assistant Director for Light Water Reactors, Division of Project Management

SUBJECT: BOARD NOTIFICATION - INFORMATION ITEM - RECENT OFFSHORE SEISMIC REFLECTION DATA AND ITS SIGNIFICANCE TO THE DIABLO CANYON NUCLEAR SITE (BN-80-6)

The attached memoranda from R. E. Jackson to J. F. Stolz and from R. B. McMullen to R. E. Jackson, both dated January 21, 1980, concerning the subject matter, are forwarded for your information.

The information concerns an interpretation of recent seismic reflection profiling data taken in shallow water across southern extensions of the San Simeon fault zone. As stated in the memoranda, Mr. Lesley, a student at the University of California at Santa Cruz, has used the above profiling data to document a connection between the San Simeon fault zone and a splay of the Hosgri fault zone and as evidence of post-Wisconsinian displacement on an offshore extension of the San Simeon fault zone.

The attached memoranda also states that the above information had either been previously documented by the applicant (evidence of post-Wisconsinian faulting on an offshore splay of the San Simeon fault zone) or assumed (connection between the San Simeon and Hosgri fault zones) in establishing the current staff position regarding the SSE for Diablo Canyon (Supplement No. 4 to the SER, dated May 1976). Therefore, the staff concludes in the attached memoranda that it sees no reason to modify the current position regarding the SSE for Diablo Canyon.
