MR. LANDO W. ZECH JR.,  
CHAIRMAN

'87 MAR -5 P2:46 2-27-87

OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

Subject:

Nuclear Regulatory Commission adoption of  
less stringent emergency evacuation  
requirements at nuclear reactors.

Dear Mr. Zech:

We fully agree with your proposal rule  
change that would now permit the  
operation of reactors at Shoreham L. I.  
and Seabrook M.H. at full power  
without state and local participation  
in their emergency evacuation plans.

Our Nations energy electrical supply is  
most vital now and for the immediate  
future, there must be Federal control  
for this total electric security system  
for all our nation people - all.

MR. LANDO W. ZECH JR.  
CHAIRMAN

We must not allow anywhere in this Great Nation a small segment of people dictate National policies on power generation, for them to make such a monumental decision on a life support energy system is ludicrous.

In event of a war many of our current and future weapons will be operated by electrical energy. Drop your arm and sure as hell you get your head knocked off.

Additional problems are on the horizon, from current reports the ozone layer is in grave trouble, acid rain can pose another serious problem. Fossil fuel will be found to be a major culprit.

(3)

MR. LA DO W. ZECH JR.  
CHAIRMAN

On a scale of 1 to 10 a fair estimate of our current position is eight (8).

Time is running out, a strong Federal stand is needed to insure safe ample clean Electrical energy for everyone in the nation -

For a lesson we should all take another hard look at Japan, France, Italy, England. Etc. ~~and~~ nuclear programs.

Our Nuclear Energy program has lacked a sense of urgency - We're falling behind fast.

Not only a few states are watching your decisions but also the whole world - They are watching our Federal Government make decisions on its vital needs It's telling them something about our strength and weakness.

Don't show them a major weakness.

(4)

MR. LANDO W. ZECH JR.  
CHAIRMAN

Please give a go ahead for all Federal  
Controlled nuclear Electrical power.

Sincerely,

A Five year second world War  
Army Veteran

Bruce A. Imackie
