Gentlemen:

In the Matter of )  
Tennessee Valley Authority )

Docket Nos. 50-327  
50-328

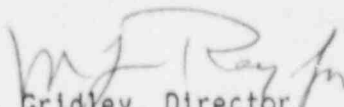

SEQUOYAH NUCLEAR PLANT (SQN) UNITS 1 AND 2 - MICROBIOLOGICALLY INDUCED  
CORROSION (MIC) PROGRAM - SUPPLEMENTAL RESPONSE

On January 20, 1988, TVA submitted the SQN MIC program and the technical basis for the piping structural integrity evaluations performed under this program for your review. Sections IV and VI of enclosure 1 and items 2 and 3 of enclosure 3 from the January 20, 1988 letter identified two Preventive Maintenance (PM) Instructions, PMs 2240 and 2241, which were to be issued to monitor MIC growth. The identification numbers for these PMs were incorrect. The correct PM numbers are 2241 (in place of 2240) and 2242 (in place of 2241). The subject PMs have been issued by TVA.

If you have any questions concerning this issue, please call D. L. Williams at (615) 632-7170.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
