On May 2, 1988, R. H. Ladun of this office conducted a routine safety inspection at the above address and at an Allentown, Pennsylvania field site of activities authorized by the above listed NRC license. The inspection was an examination of your licensed activities as they relate to radiation safety and to compliance with the Commission's regulations and the license conditions. The inspection consisted of observations by the inspector, interviews with personnel, and a selective examination of representative records. In addition, our inspection examined the activities covered in your correspondence dated January 29, 1988. The findings of the inspection were discussed with Mr. L.
