FEB 24, 1987

Chairman Louis Zeck
U.S. Nuclear Regulatory Comm.
Washington, D.C.

Dear Mr. Zeck:
I am greatly perturbed
by what I have been reading
in 'Newsday' - that is the latest
NRC. Circumvention of the peoples'
will - to get Shabbon into
operation despite the fact that
the State & Local governments have
not approved, nor will they, an
emergency plan for evacuation.

DS10

Of the people - should that become
necessary -

And necessary it will
become as that plant - as
everyone knows - is an accident
waiting to happen! Haphazard
Construction, poorly trained personnel -
fancy equipment & God alone
knows what else. Nor is it needed
for electricity, as Liko claims. But
Liko has lied before, & it will
do so again. Do not let that
plant go on line!

Sincerely
Judith Bronstein
