to: Secretary  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555  
Att.: Docketing and Service Branch.

Gentlemen,

I am opposed to your proposed rule change reg. Emergency Planning Zones, which would call for site specific EPZ's instead of the current 10 mile emergency zone. After the accident at Chernobyl this is incomprehensible to me and certainly casts a lot of doubts on your honesty, capability and integrity of regulating the nuclear industry.
