Docket No. 50-352

Philadelphia Electric Company
ATTN: Mr. C. A. McNeill
Executive Vice President
Nuclear
2301 Market Street
Philadelphia, Pennsylvania 19101

Gentlemen:

Subject: Routine Safety Inspection Number 50-352/88-14

This refers to the routine safety inspection conducted by M. Dev of this office on June 1 - 3, 1988, at the Limerick Generating Station, Unit-1, Limerick, Pennsylvania of activities authorized by NRC License NPF-39 and to the discussions of our findings held by M. Dev with Mr. J. Doering of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. Our inspector also verified the steps you had taken to correct the violation brought to your attention in a letter dated November 12, 1987. We have no further questions regarding your action on this matter at this time.

Within the scope of this inspection, no violations were identified. However, your attention is warranted to the completion of the review of NRC Generic Letters (discussed in paragraph 3.3.1). It appears that no documentation was available to demonstrate that certain Generic Letters were evaluated and that appropriate actions were implemented.

No response to this letter is required.

Your cooperation with us in this matter is appreciated.

Sincerely,

ROBERT M. GALLO
