Washington, D. C. 20555

Gentlemen:

SUBJECT: Dairyland Power Cooperative (DPC)  
La Crosse Boiling Water Reactor (LACBWR)  
Provisional License No. DPR-45  
Quality Assurance Program Description (QAPD)

REFERENCES: (1) 10 CFR 50, Section 50.54(a)(3)  
(2) 10 CFR 50.71  
(3) NRC Letter, Berkow to Taylor, dated August 4, 1987  
(LAC-65198)  
(4) DPC Letter, Taylor to Document Control Desk, dated  
December 21, 1987 (LAC-12408)

Reference 4 submitted Revision 5 of the La Crosse Boiling Water Reactor's Quality Assurance Program Description (QAPD) for a possession-only condition.

Based on communications with Mr. Sutphin of Region III, we are resubmitting portions of Revision 5 to incorporate some editorial changes and clarifications.

We are also submitting revised pages which reflect an organizational change which took place on January 1, 1988. This organizational change does not affect the effectiveness of the QA Program; it changes the title of QA Supervisor to QA Director and the reporting relationship from Plant Superintendent to Assistant General Manager-Operations. Availability of the General Manager for resolution of safety concerns remains the same. The QA Director will remain responsible for implementing and monitoring quality assurance activities at LACBWR and the change in reporting will enhance the independence of the Quality Assurance Group.

Attached are the revised pages of our QAPD and a List of Changes which will describe all editorial changes and list the pages that are affected by the reorganization.

If there are any questions concerning this submittal, please contact us.

Sincerely,

DAIRYLAND POWER COOPERATIVE

  
James W. Taylor, General Manager

DAIRYLAND POWER COOPERATIVE

LACBWR PLANT

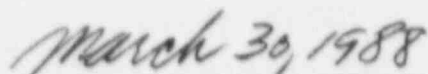

STATEMENT OF QUALITY ASSURANCE POLICY

The Quality Assurance Program described herein has been developed by the Dairyland Power Cooperative to assure safe and reliable operation of LACBWR. This program is designed to meet the requirements of Title 10 of the Code of Federal Regulations, Part 50, Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," as it would apply to a possession-only condition.

The Quality Assurance Program applies to all activities affecting the functions of the structures, systems, and components that are associated with a possession-only license. These activities include design, operations, maintenance, repair, fuel handling, testing, and modifications.

The DPC QA Director is responsible for the establishment of a Quality Assurance Program which meets the requirements of 10 CFR 50, Appendix B, and implementing the program.
