Document Control Desk  
Office Nuclear Safety & Safeguards  
Washington, D.C. 20555

Attention: Mr. Hugh L. Thompson, Jr.  
55396-MNSS Docket Material

Reference: NRC letter dated March 23, 1988, A. Thomas Clark,  
Jr. to AlChemIE, Inc., D. L. Bell.

Gentlemen:

The above referenced letter requests that additional information be provided by AlChemIE in support of our request for an exemption from the requirement of obtaining a construction permit prior to starting construction activities on a temporary storage area. The following provides the information requested in the third, fourth, and fifth paragraphs of the referenced letter.

In response to the third paragraph the specific activities to be undertaken relative to the construction of the storage facilities would be site grading, pouring of two slabs for classified and unclassified equipment storage, construction of a steel framed building with aluminum siding and roof for classified equipment storage and a perimeter security fence. In 10CFR50.10(c) the proposed initial construction activity would be permissible under paragraph (3).

In response to your request contained in the fourth paragraph of the referenced letter, please find attached a letter from the Town of Oliver Springs. This letter confirms the Town's intent to develop the site as a general industrial park independent of AlChemIE's activities.

Page 2

In response to the fifth paragraph it can be pointed out that in the event that the proposed AlChemIE facility was not constructed at this site the storage areas could be sold to another private corporation locating in the industrial park. In addition the storage areas could be returned to their original use as pasture land by removing the storage building, the concrete slabs and the fencing.

Should you have any questions or require additional information, please call Mr. W. A. Pfeifer at AlChemIE.

Very truly yours,

ALCHEMIE, INC.

Dennis L. Bell
