

THE FORT ST. VRAIN  
INITIAL APPROACH  
TO POWER (B-SERIES)

INTERIM REPORT 47  
Report For Period Ending May 10, 1988

*IE 26*  
*11*

Interim Report 21 covering the 90-day period from August 23, 1981, to November 22, 1981, reported the completion of the majority of tests at 100% of plant load. Significant power levels or appropriate plant conditions required for remaining tests have not been achieved since then. During the period covered by this report, the reactor did not operate above 80% power. The reactor is currently limited to 82% power by the Nuclear Regulatory Commission. No further initial approach to power tests were performed during the 90-day period ending May 10, 1988.

Further interim reports will report the results of any startup tests which will remain in the "open" status.
