

July 18, 1988

Docket No.: 50-293

Mr. Ralph G. Bird  
Senior Vice President - Nuclear  
Boston Edison Company  
Pilgrim Nuclear Power Station  
RFD #1, Rocky Hill Road  
Plymouth, Massachusetts 02360

Dear Mr. Bird:

SUBJECT: GENERIC LETTER 83-28, ITEM 2.2 (PART 1), "VENDOR INTERFACE (PROGRAMS FOR ALL OTHER SAFETY RELATED COMPONENTS)" - SAFETY EVALUATION

REFERENCE: TAC NUMBER 53702

By letter dated November 7, 1983 and October 1984, you responded to the NRC staff position on the subject identified above. Your responses provided details of the program for classifying all safety-related components other than Reactor Trip System (RTS) components. The program assures that documents and information handling systems that are used to control plant activities that may affect these components identify the components as safety-related.

The NRC staff with the assistance of it's contractor, Idaho National Engineering Laboratory, has completed the review of your submittals. We have concluded that your program addresses our concerns regarding equipment classification and is acceptable. The details and basis for our conclusion are provided in the enclosed safety evaluation.

This completes our action related to Generic Letter 83-28 Item 2.2.1. By letter dated May 4, 1988 we requested additional information necessary to complete our review of Item 2.2.2. Therefore the above referenced TAC number remains open.

Sincerely, **Original signed by:**

Daniel G. McDonald, Project Manager  
Project Directorate I-3  
Division of Reactor Projects I/II
