Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-348/88-01 AND 50-364/88-01

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by P. G. Stoddart and W. B. Gloersen on January 4-7, 1988. The inspection included a review of activities authorized for your Farley facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The purpose in reviewing the allegations in this report was to evaluate the technical elements of an allegation, not to evaluate the aspects of an allegation normally reviewed by the NRC's Office of Investigations.

In addition, this report details findings of Report Nos. 50-348/86-05 and 50-364/86-05, which initially reviewed many of these allegations. Specific details from that inspection were not included in the report since they may, at that time, have identified a confidential allegor.

Within the scope of the inspection, no violations or deviations were identified.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
