Shift Technical Advisor Training

The purpose of this letter is to inform you of a revision in a commitment made several years ago related to Shift Technical Advisor (STA) continuing training,

In a letter dated January 30, 1981 we provided our original STA Program for NRC review. Since that time, we have completed an STA task list at Prairie Island for an accredited STA Program. This performance based program departs in many respects from the original program submitted in 1981.

Northern States Power Company is a member of the National Academy for Nuclear Training. Prairie Island will conduct STA training in the future in accordance with the accredited program. A copy of this program and course outlines for STA training and continuing training are available at the Prairie Island Training Center for NRC inspection.

Please contact us if you have any questions related to these changes in our STA Program.
