U.S. Nuclear Regulatory Commission
611 Ryan Plaza Drive - Suite 1000
Arlington, TX 76011

SUBJECT: Waterford SES Unit 3 Docket No. 50-382, License No. NPF-38
1987 SALP Progress Report

REFERENCES: NRC letter dated April 30, 1987 from R.D. Martin to J.G. Dewease

Dear Mr. Martin:

You may recall that near the end of the 1986 SALP evaluation period for Waterford 3, we provided you, at your request, a retrospective review of our accomplishments during 1986. Preparing that SALP Progress Report proved a useful and refreshing exercise for us in focusing our attention on the positive developmental aspects of our organization and plant. It also provided us another opportunity to evaluate progress over an extended period of time in attaining our mutual goals of safe and efficient nuclear plant operation.

We have, therefore, decided to submit the enclosed SALP Progress Report for the current SALP rating period which began on February 1, 1987. Although the SALP period extends through July 1988, the remainder of that time will be largely taken up by the second refueling outage for Waterford 3, scheduled to commence in early April. We expect to supplement the SALP Progress Report with a review of outage activities following completion of the outage.

Waterford 3 management and staff are justifiably proud of our accomplishments through 1987 and early 1988. We feel that we have made significant strides in satisfying not only your observations from the 1986 SALP report, but in working toward our own goals of excellence in all facets of nuclear plant operation. For each SALP functional area, you will note, the enclosed report addresses our initiatives in response to your previous SALP assessment, and discusses many other significant accomplishments and objectives aimed at an integrated approach to plant safety and operations.

"AN EQUAL OPPORTUNITY EMPLOYER"

JE40

The majority of the SALP Progress Report reviews actions completed at Waterford 3 during 1987. In certain instances, we felt it worthwhile to provide you with some idea of our future plans in order to present an overall picture of our goals and objectives. Because specific details may change as we begin implementation in these areas, please do not treat this report as a commitment document, but rather as a general roadmap to the extent that it deals with future activities.

Should you find it useful to have additional information in any area touched on by this report, please do not hesitate to contact us.

Yours very truly,

Sor J.G. Dewease
Senior Vice President -
Nuclear Operations
