Analytical Bio-Chemistry Labs., Inc.  
ATTN: James Ault  
P. O. Box 1097  
Columbus, MO 65205

Gentlemen:

Please note that License Condition 17. has been changed to state that you shall not increase the amount of carbon-14 beyond that currently being released. As you stated in our telephone conversation the maximum amount released per month is approximately 6.5 millicuries. Also, the condition now requires that records be maintained of the total amount dis; sed.

Condition 18. requires samples be collected and analyzed and records of results be kept. This will allow the accumulation of data for further review and evaluation.

If you have any questions or require clarification on any of the information stated above, you may contact us at (312) 790-5625.

Sincerely,

Original Signed By  
Evelyn R. Matson

ABC Lab

SUBJECT

Issue Condition 17 of amendment

PO. C.8

SUMMARY

Mr. Gust stated that this issue condition puts him in

position because ABC Lab has been routinely discharging of C-121 waste water via land application or lagoon for about 10 years. Currently they are discharging a maximum of 6.5 million gallons a month in ongoing research studies. and he stated if he must stop it would have an extremely significant impact on the organization.

I explained to him that I was unaware of that he was actually handling C-14 waste water this way and I would note the license condition with only the studies decided in letter dated June 17, 1987 and August 19, 1987 in mind.

I told him I would look into this further and get back to him.

SUBJECT

Analytical Biochemistry Laboratories 24-13365-01

Land Application of C-14 contaminated waste water.

SUMMARY

OGC stated (Tom Dorian) that in this case it is better law and policy to consider this activity (land application of C-14) under 20.302. NRC will look at these requests on case by case basis. Therefore, ABC Labs request will be sent to Vandy Miller as a Technical Assistance Request and HQ will coordinate with waste management.

It appears that this activity falls under the categorical exclusions of 10 CFR Part 51 for environmental review purposes, the waste is waste from research.
