

JUL 18 1988

Florida Power Corporation  
Mr. Walter S. Wilgus  
Vice President  
Nuclear Operations  
ATTN: Manager, Nuclear Licensing  
P. O. Box 219  
Crystal River, Florida 32629

Gentlemen:

SUBJECT: DOCKET NO. 50-302

This acknowledges the receipt of your letter of June 24, 1988, which transmitted Revisions 4-22 and 4-24 to the Crystal River Physical Security Plan.

Our review of the changes has found portions of the changes to be consistent with the provisions of 10 CFR 50.54(p). One portion is not consistent with the provisions of 10 CFR 50.54(p) as delineated in the enclosure to this letter. To preclude a violation of regulatory requirements, you must not continue to implement that change. Please modify your plan to accommodate the enclosed comments and resubmit corrected plan pages as necessary to maintain plan continuity. Should you want to pursue the change deemed inconsistent, you must submit a request to the Commission's Office of Nuclear Reactor Regulation under the provisions of 10 CFR 50.90 for amendment to your license.

The changes made to the communication system for contacting the local law enforcement authorities will be reviewed during the next physical security inspection.

Our concerns were discussed between Ms. P. Haines of your staff and Ms. C. Penny of this office on July 7, 1988.

The enclosure to your letter is being withheld from public disclosure because it contains Safeguards Information and must be protected in accordance with the provisions of 10 CFR Part 73.21.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

William E. Cline, Chief  
Nuclear Materials Safety and  
Safeguards Branch  
Division of Radiation Safety  
and Safeguards

Enclosure:  
Inconsistent Change

ENCLOSURE

REVISION 4-24 TO THE CRYSTAL RIVER  
PHYSICAL SECURITY PLAN

<u>Page</u>	<u>Section</u>	<u>Comment</u>
44	5.9	<p>The plan was revised to allow the waiver of certain access control requirements during preplanned emergency drills and exercises. The Florida Power Corporation (FPC) evaluation of the changes stated that they met the guidelines of Regulatory Guide 5.65, Section 5.5.</p> <p>Our review of the changes identified one which is not consistent with the Regulatory Guide 5.65. Specifically, the Guide states that offsite emergency response personnel may enter the protected area and certain access-safeguards requirements may be waived provided:</p> <p>.... The licensee positively identifies at least one member of the emergency response team who verifies that the other personnel are bona fide members of the responding organization.</p> <p>The changes to the security plan stated that the above requirement would be performed prior to the responding organization leaving the site. The action must be performed prior to the responding organization entering the site.</p>
