IE INFORMATION NOTICE NO. 81-39: EPA CROSSCHECK PROGRAM - LOW LEVEL
RADIOIODINE IN WATER INTERCOMPARISON STUDY

Description of Circumstances:

During the last week of January, the Environmental Protection Agency (EPA), in cooperation with NRC, is planning to distribute test samples of low level radioiodine in water (<10 pCi/l) through the EPA Environmental Radioactivity Laboratory Intercomparison Studies Program (Crosscheck Program). This test will enable the user laboratory to verify its capability to quantitatively detect low levels of radioiodine in water by radiochemical techniques. Licensee laboratories interested in participating in the test can call or write:

U.S. Environmental Protection Agency
Environmental Monitoring Systems Laboratory
P.O. Box 15027
Las Vegas, NV 89114
ATTN: Art Jarvis, Quality Assurance Coordinator
or George DeLullo, Intercomparison Coordinator

(Telephone) 702-798-2674
(FTS) 545-2674

Participation in this program is voluntary unless required in facility technical specifications or license conditions.
