

JOHN G. CESARE,
Director
Nuclear Licensing

April 11, 1988

Mr. L. L. Kintner, Project Manager
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Mail Stop 14B20
Washington, D.C. 20555

Dear Mr. Kintner:

SUBJECT: Grand Gulf Nuclear Station
Unit 1
Docket No. 50-416
License No. NPF-29
Safety Issues Management System -
Additional Items
AECM-88/0077

Reference 1: MAEC-87/0208, dated 9/2/87
Reference 2: AECM-87/0186, dated 10/2/87

System Energy Resources, Inc. (SERI) has been working with the Nuclear Regulatory Commission (NRC) to provide implementation data for the NRC Safety Issues Management System (SIMS). The initial transmittal of SIMS items was sent to SERI by Reference 1. SERI responded to that request with Reference 2.

Additional SIMS items were telecopied to SERI on October 1, 1987. Implementation data on these additional items are contained in the attachment to this letter.

In addition, selected items from Reference 1 were changed based on clarification provided in telephone calls and meetings with the NRC regarding specifically what was meant by licensee implementation date in those cases. These changes are also included in the attachment. Unchanged items from Reference 2 are not included in the attached listing.

The majority of the additional items issued by the October 1, 1987 telecopy are included in the attachment. Final data for the remaining items is being obtained by SERI and will be submitted in an update by April 29, 1988.

Dates for tasks still open are to be considered best estimate forecasts and are not commitments.
