U. S. Nuclear Regulatory Commission  
Document Control Desk  
Washington, D.C. 20555

Gentlemen:

River Bend Station - Unit 1  
Docket No. 50-458  
NRC Bulletin 87-02, Supplements 1 and 2

Attached is Gulf States Utilities Company's (GSU) response to NRC Bulletin 87-02, Supplements 1 and 2 "Fastener Testing to Determine Conformance with Applicable Material Specifications."

The attachments provide the information requested by Action Items 1 and 2 of these supplements.

If you have any questions or require additional information, please contact Mr. L. L. Dietrich of my staff at 409/838-6631, ext. 4603.

Sincerely,

J. E. Booker  
Manager-River Bend Oversight  
River Bend Nuclear Group

STATE OF TEXAS                                 §  
COUNTY OF JEFFERSON                         §  
In the Matter of                                 §             Docket No. 50-458  
GULF STATES UTILITIES COMPANY                 §  
  
    (River Bend Station,  
        Unit 1)

J. E. Booker, being duly sworn, states that he is Manager-River Bend Oversight; that this position requires him to submit documents to the Nuclear Regulatory Commission in behalf of Gulf States Utilities; that the documents attached hereto are true and correct to the best of his knowledge, information and belief.

J. E. Booker  
J. E. Booker

Subscribed and sworn to before me, a Notary Public in and for the  
State and County above named, this 25 day of July, 1988.

Martha C. Hubbard  
Notary Public in and for  
Jefferson County, Texas

1-11-90

## Attachment 1

Response to actions requested in NRC Bulletin 87-02, Supplement 1 as clarified by Supplement 2:

### Action

1. Provide a list of the suppliers and manufacturers from which safety-related ferrous fasteners  $\frac{1}{2}$  inch in diameter or greater may have been purchased, within the past 10 years, including addresses. For those fasteners purchased from fastener suppliers and/or original equipment manufacturers, any available information that identifies the manufacturer or sub-tier supplier of the fasteners also should be provided. Approved Vendor List or Qualified Supplier Lists are the intended sources for this information. Addressees are not required to search purchase order files, contact subcontractors to obtain the information, or submit data on fasteners supplied as part of an original component.

### Response

1. Attachment 2 is a list of suppliers and manufacturers from which safety-related ferrous fasteners  $\frac{1}{2}$  inch in diameter or greater may have been purchased in the past 10 years. This list was derived from the GSU Qualified Suppliers List (QSL) and the Stone and Webster (S&W) Quality Rating List, used during construction of River Bend Station (RBS). S&W was the architect/engineer for RBS. Additional sub-tier vendors and manufacturers were added as a result of review of purchase order files and of fasteners' manufacturers' markings. Each vendor manufacturer in Attachment 2 is assigned a number. In those cases where a vendor was found to have provided material which was bought from and/or manufactured by another company, the number for that sub-tier vendor will appear below the vendor's address. Those companies which were direct vendors to GSU or S&W have a "V" in the left margin. These companies may have also served as sub-tier vendors. Those without a "V" were only sub-tier vendors. For those vendors on the QSL which were authorized to be vendors of fasteners but for which no evidence of procurement activity for fasteners could be found, an "N" appears in the left margin. Vendors from which commercial grade fasteners were bought have a "C" in the left margin.

### Action

2. For nonsafety-related fasteners, provide the same information as requested in the first two sentences of item 1, above, except that a) the time of interest is for fasteners procured in the last 5

years, and b) the search of available records in this case should include purchase orders unless the licensee utilizes approved vendor lists or qualified supplier lists in procuring nonsafety-related fasteners. This information collection is understood to be on a best-effort basis. Further, addressees are not required to contact subcontractors to obtain the information or to submit data on fasteners supplied as part of an original component.

#### Response

2. Attachment 3 is a list of suppliers and manufacturers from which nonsafety-related ferrous fasteners  $\frac{1}{4}$  inch in diameter or greater may have been purchased in the past 5 years. This list was derived from review of stock for manufacturers' markings and of purchase orders. Each vendor/manufacture in Attachment 3 is assigned a number. In those cases where a vendor was found to have procured material from a sub-tier vendor, the number assigned to that sub-tier vendor will appear below the vendor's address. Those companies which were direct vendors to GSU have a "V" in the left margin. These companies may have also served as sub-tier vendors. Those without a "V" were only sub-tier vendors.
