2) NRC letter to Detroit Edison, dated October 9, 1987

Subject: PM Program Status for February 1988

Dear Mr. Davis:

Item 2 of NRC letter dated October 9, 1987, requested Detroit Edison to reassess the status of the Fermi 2 Preventive Maintenance (PM) Program as discussed in Detroit Edison's letter dated October 3, 1987. In addition, Detroit Edison was requested to provide a monthly status report to the NRC on the PM Program.

Three hundred and ten (310) priority "A" PMs were reviewed for scheduled disposition in February. One hundred and ninety-four (194) were evaluated and rescheduled with justification. Therefore, the number of PMs scheduled for February was one hundred and sixteen (116). Table 1 shows the scheduled priority "A" PMs through the LLRT Outage.

Of the one hundred and sixteen (116) scheduled priority "A" PMs, ten (10) were not completed, but were evaluated as acceptable in accordance with Fermi Procedure 12.000.17. Three (3) additional priority "A" PMs were completed during the month ahead of schedule, bringing the total completed to one hundred and nine (109).

All backlogged Priority "A" PMs will be accomplished by the end of the LLRT outage or rescheduled with justification.

If you have any questions, please contact Ms. Lynne S. Goodman at (313) 586-4211.

Sincerely,

Enclosure

This letter is being remailed because the correspondence that was previously sent did not contain the enclosure.

Please discard the previous letter and keep this one for your files.

Thank you.

TABLE 1
PRIORITY A ITEMS SCHEDULE

SCHEDULE/	1987 Dec.	1988 Jan.	1988 Feb.	1988 LLRT OUTAGE
