Docket: 50-285/87-27

Omaha Public Power District  
ATTN: Mr. Kenneth J. Morris-  
Division Manager Nuclear Operations  
1623 Harney Street  
Omaha, Nebraska 68102

Gentlemen:

Thank you for your letter of April 27, 1988, in response to our letter and Notice of Violation and Proposed Imposition of Civil Penalty dated February 22, 1988. We have reviewed your reply and find it responsive to the concerns raised in our Notice of Violation. We will review the implementation of your corrective actions during a future inspection to determine that full compliance has been achieved and will be maintained.

During review of your response, it was noted that the completion dates for your corrective actions were identified to be as late as March 1989. Due to the significance placed by the NRC on the timely completion of your corrective actions, you are requested to provide, at least 30 days prior to plant startup after your upcoming refueling outage, a status of all instrument air problems that will not be completed during that outage.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,

Original Signed by:

L. J. Callan, Director  
Division of Reactor Projects
