Dear Sir:

This application proposes to revise Section 4.6.G.1 ("Jet Pumps") of the James A. FitzPatrick Nuclear Power Plant Technical Specifications to correct a typographical error. APPLICATION FOR AMENDMENT TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, the New York Power Authority, as holder of Facility Operating License No. DPR-59, hereby applies for an Amendment to the Technical Specifications contained in Appendix A of this license.

The application proposes to revise Section 4.6.G.1 to correct a typographical error. NRC Inspection Report 50-333/78-05 identified a conflict in Section 4.6.G.1 and the corresponding bases section. The change proposed by this application resolves the conflict by revising Section 4.6.G.1 to agree with the corresponding bases. Section 4.6.G.1 specifies surveillance requirements to verify jet pump performance. Section 4.6.G.1 (page 145) is revised to reduce the maximum permissible recirculation loop flow imbalance from 15 to 10 percent. The 10 percent value is consistent with the Technical Specification bases, NRC staff, and industry guidance.

The proposed changes to the Technical Specifications are Attachment I to this Application for Amendment to the Operating License. The Safety Evaluation for the proposed changes is included as Attachment II.
