United States Nuclear Regulatory Commission
Region III, Licensing Section
Materials Licensing Branch
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Gentlemen:

Re: License No. 12-12724-02
Document No. 030-09876

AMENDMENT TO LICENSE

Two copies of an application to amend the materials license No. 12-12724-02 are enclosed. The two Cesium 137 sealed sources that were installed at the Baldwin Power Station have been removed from service and returned to Texas Nuclear, the manufacturer, for disposal. A copy of the manufacturer's confirming receipt is attached to the application.

This change completes the removal of all Cesium 137 from the Baldwin Power Station and requires that all references to the Baldwin Power Station and its personnel be deleted from the license. The required deletions have been identified on the attached application form NRC-313-1.

A check in the amount of forth dollars (\$40.00) for the required fee is also enclosed.

If you need additional information or have any questions regarding the attached documents, please call me at (217)424-7533 or write to the above address.
