

April 12, 1988

Mr. David W. Cockfield  
Vice President, Nuclear  
Portland General Electric Company  
121 S.W. Salmon Street  
Portland, Oregon 97204

Dear Mr. Cockfield:

SUBJECT: NRC BULLETIN 87-01, "THINNING OF PIPE WALLS  
AT NUCLEAR POWER PLANTS"

On July 9, 1987, NRC Bulletin 87-01 was issued requesting that licensees for nuclear power plants holding an operating license or a construction permit submit information concerning their programs for monitoring the thickness of pipe walls in high-energy single-phase and two-phase carbon steel piping systems. Portland General Electric Company responded to the Bulletin by letter dated September 18, 1987.

The information you provided is being used to determine the extent of industry participation and implementation of erosion/corrosion inspection programs and to obtain data on observed pipe wall thinning. While the staff has reviewed your response in that context, no further plant-specific action with respect to the Bulletin is required at this time.

We will notify you should there be any future action that may be required regarding the subject of Pipe Wall Thinning. Should you have any question, I can be contacted at (301) 492-1366.

Sincerely,

original signed by

Terence L. Chan, Project Manager  
Project Directorate V  
Division of Reactor Project - III,  
IV, V and Special Projects
