Bruce S. Mallet Ph.D., Chief
Materials Licensing Section
United States Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

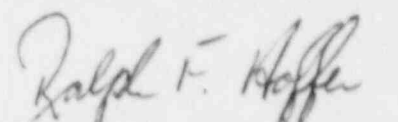

Gentlemen:

Enclosed are two copies of the final addendum report (AEBG-36-110A) documenting the completion of the radiation decontamination activities within Building D of Air Force Plant No. 36 located at Evendale, Ohio.

Please discard the interim reports forwarded to you June 30, 1987 by Harold C. Swango. The enclosed reports incorporate all the additional administrative detail transmitted to you on July 15, 1987 into a bound report.

Also enclosed with the report are two copies of the computerized compilation of the contaminated spots detected during the recent radiological monitoring survey conducted by Nuclear Support Services, Inc.. This data is the same as that transmitted to you on July 15, 1987 with an additional fourth sort. If you desire any additional sorting, please let me know.

As soon as you are sure of the date of your visit to this facility, please let Harold Swango or myself know so your security clearance can be made. This will avoid any delay in entering the Plant.

Ralph F. Hoffer,
Industrial Hygienist
