Mr. James G. Keppler
Regional Administrator
U.S. Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, IL 60137

Subject: LaSalle County Station Units 1 and 2
Supplemental Response to Inspection
Report Nos. 50-373/85-016 and 50-374/85-016

References (a): L. A. Reyes letter to Cordell Reed dated
January 6, 1985.

(b): D. L. Farrar letter to J. G. Keppler
dated July 2, 1985.

Dear Mr. Keppler:

Commonwealth Edison's response to reference (a) specified the actions which had been and would be taken to correct the vibration monitoring program required by Section XI of the ASME Code and as delineated in the LaSalle Inservice Testing Programs (IST). The implementation of the revised procedure for the new vibration trending program committed to in reference (b) is complete. To provide a more accurate description of LaSalle's IST vibration monitoring program a revision to the relief request RP-04 was completed and on-site reviewed. However, submittal of the Unit 1 and Unit 2 IST revisions by January 1, 1986 was not accomplished due to the expectation that the review of the previously submitted IST program is nearly completed at NRR. Commonwealth Edison in conjunction with discussions with A. Bournia (NRR) prefers to delay submittal of the revised program until this review is completed and a SER is issued. This is expected soon. The revised program will be submitted by June 1, 1986.

A telecon with Messrs. W. Guldemon, M. Jordan, J. Bjorgen and T. Hammerich was held on December 20, 1985 to discuss the status of the corrective actions. The delay of the submittal of the revised IST program was acceptable to W. Guldemon.

If you have any further question regarding this matter, please direct them to this office.

Very truly yours,
